

## **Observations and conclusion on the Presenting reporting structure (DHIS II/NRHM/MCH) of surveyed blocks of RAJNANDGAON District**

- The RD team visited randomly selected 4 blocks of the districts, from each block one PHC was selected randomly. One sub center selected from selected PHC based on operation feasibility. (Annexure I)
- In the surveyed blocks, three parallel reports (MCH, NRHM and DHIS II) are generated from blocks and submitted to district within prescribed guidelines. DHIS II/HMIS reports are filled by ANM at sub centers; Sector Health supervisor compiles Sub centers reports and submit to CHC. At block, health supervisor, BE, BADA, along with DEO compile the reports. The facility wise reports were entered into online software provided at block.
- The team observed that there is lot of confusion about the reporting UNITS at peripheral health institute i.e. facility wise or area wise. The double reporting was observed in Ghumka and Khairagarh blocks and in some pockets of the other surveyed blocks. District HMIS officer should take IMMEDIATE step to correct the confusion. The DDO should focus on accuracy and relevance of the data and should ensure that all the columns are duly completed. If there is any problem in entering data in the prescribed format, he may discuss the same with the concerned and immediately sort out the matter then and there. The he should act like facilitator as well as instructor.
- The one day training on the reporting proforma of DHIS II completed at block level. The guidelines give broad instructions to various users on the forms which are to be filled up, and were available at blocks but none of the interviewed staff gone through that. The 21 interviewed health workers (related to reporting), are unable to understand some of data elements present in the proforma. They requested for orientation training at peripheral health institute especially to ANMs and PHC staff workers.
- The DEO, BADA and Supervisor are preparing 3 reports i.e. DHIS II, HMIS and MCH separately. Lot of discribancyhas been observed in the 3 reports. There should be coordination between the staff so that reports can be prepared based on the actual data. It has also been observed that coordination is

lacking at peripheral health institute and district level regarding parallel reporting.

- There should be interaction and feedback between DDO and DEO/BADA before and after submission of reports.
- The poor quality of Xerox proforma was still utilized for reporting while the DDO informed that the printed proforma booklets were distributed to block, but the DEO and BADA have no idea regarding the printed book, which clearly indicated communication gap between district and peripheral institute.
- Reporting variations is to be rectified and corrective actions are to be initiated at district level by mutual understanding of DDO and Assistant Statistical officer.
- More focus should be given at validation error at each levels of reporting units, for example BCG dosages are far more than actual live births in some surveyed blocks and PHC/HSC level. The BMO and Reporting staffs should vigil on such data items and establish inbuilt system of monitoring at block level.
- At Primary health centers, the Medical officer should involvement of in the data verification report in lieu of only signing. Interviewed medical officers urged refresh training on the present reporting system.
- The services of DEO are used for all sundry jobs, activities beyond their compass. There is a need to focus workforce in fruitful manner for improvement of the data quality.

**SOME OF THE INTERPRETATION REGARDING DATA OF THE DISTRICT AND SURVEYED BLOCKS:**

- a) **In month of May 2010, the district showing (3060/3066=99%) of the New mother registered for ANC. How reliable this data is?**

Table shows district ANC registration and new registered JSY mother and its discrepancy

	District level data HMIS was forwarded to state and showing on the HMIS web site of Govt of India	Surveyed Block 3 (Dongergarh)	Surveyed block 4 Dongergaon
Total number of pregnant women Registered for ANC	3066	444	251
New women registered under JSY	3060	147	129
<b>Difference</b>	<b>6</b>	<b>297</b>	<b>122</b>
<b>The data needs to validate at each level before aggregation</b>			

***Interpretation:***

*It looks nice to see the data of the district regarding achievement of JSY registration but it does not match if you verify the data of peripheral health institute.*

*Some health reporting area had JSY less than ANC registration while it was found exceeded in some health institute.*

*The overall data of the reporting units are equally important, if it has to be taken into account, that's why it is essential that differences noticed in the data items needs to be verified at each level and data to be entered at each level very carefully and in correct manner.*

*The health supervisor should look sub center wise reports of the newly registered pregnant women and status of the JSY registration, so that errors are rectified and corrected at peripheral level. The DDO should also look into the mater and keep a watch at block data compilation.*

## b) BCG is more than Live Births: Facts from Field area

The data verified from the surveyed blocks of the district, there was discrepancy among the BCG and Live birth in the different reporting formats at blocks.

### The table showing the BCG and Live birth variation

	HMIS web site District Rajnathgaon			Block 1 Ghumka			Dongergaon			Dongergarh (NRHM)		
	April	May	June	April	May	June	April	May	June	April	May	June
Live birth	2155	2001	2698	359	380	389		119	133	133	251	270
BCG	2105	2263	2538	371	377	388		168	168	134	268	251
<b>Difference</b>	<b>50</b>	<b>-262</b>	<b>60</b>	<b>-12</b>				<b>-49</b>	<b>-35</b>	<b>-1</b>	<b>-7</b>	

### Intra reporting variations Dongergarh block

	NRHM report				Sub Total	HMIS/DHIS II			Sub Total	Difference
	April	May	June	Sub Total		April	May	June		
Live Birth	251	305	330	<b>886</b>	133	251	270	<b>654</b>	<b>232</b>	
BCG	268	290	309	<b>867</b>	134	268	251	<b>653</b>	<b>214</b>	
Difference	-17				-1	-17				

### Intra reporting variations Dongergaon block

	NRHM report			Sub Total	DHIS II		Sub Total	Difference
	May	June	Sub Total		May	June		
Live Birth	119	133	<b>252</b>	70	83	153	<b>99</b>	
BCG	168	168	<b>336</b>	168	173	341	<b>-5</b>	
Difference	<b>-49</b>	<b>-35</b>		<b>-98</b>	<b>-90</b>	<b>-188</b>		

### Interpretations:

In surveyed blocks, BCG vaccination was reported twice/repetition of reports noticed at reporting units.

The CHC and PHCs reports are not added in the DHIS II reports in the Dongergarh blocks. The area wise reports are added in the compilation of PHC in Ghumka block.

At visited CHC and PHC health facilities, it has been noted that no. of live birth are more than the BCG vaccination indicates that some of the new born babies are discharged after delivery without giving zero dose.

Private health institution deliveries are not added in the facility wise reporting while it was noted in MCH and other reporting.

**c) Sterilization complications:**

*At Dongergarh Block the sterilization complications was mentioned during April and June 2010 DHIS II reports, whereas it was not reflected in the NRHM report.*

31	<b>Quality in sterilization services* DHIS II</b>	April	May	June 2010
31.1	Number of complications following sterilization			
(a)	Male	6	0	0
(b)	Female	13	5	1
	Total {(a) to (b)}	19	5	1
31.2	Number of failures following sterilization			
(a)	Male	3	1	0
(b)	Female	4	2	0
31.3	Number of deaths following sterilization			
(a)	Male	1	0	0
(b)	Female	0	0	0
	Total {(a) to (b)}	0	0	0

*? Might be inadvertently mentioned but it should be verified by the concerned officer before forwarding such type of data*

**d) Adverse events following immunization (⊗DHIS II)**

<b>Adverse Event Following Immunization (AEFI)</b>	<b>NRHM</b>			<b>DHIS II</b>		
	<b>April</b>	<b>May</b>	<b>June</b>	<b>April</b>	<b>May</b>	<b>June</b>
Abscess				0	0	1
Death				1	0	0
Others				0	2	0

**\*Dongergarh Block**

There was discrepancy among the parallel reporting of the block, data should be verified before uploading, the block needs reorientation training regarding filling the proforma with level of understanding of prescribed data items.

**e) Mortality reports variation**

<b>Reported deaths (all)</b>		Surveyed Blocks (Reported)				<b>Total</b>
		<b>GHUMKA</b>	<b>KAIRAGARH</b>	<b>DONGERGARH</b>	<b>DONGERGAON</b>	
A	REPORTED Deaths IN MCH REPORTS (April to June 2010) in surveyed blocks	<b>143</b>	<b>222</b>	<b>225</b>	<b>213</b>	<b>803</b>
B	REPORTED DEATHS IN HMIS REPORTS AT <b>DISTRICT</b> <b>RAJNANDGAON</b>	<b>262</b>				<b>262</b>
<b>Discrepancy in reports</b>						

**Interpretation:**

There was also discrepancy in the mortality data at each level, which needs to be corrected; it should tally at each level and at different reporting system also.

## Annexure I

Discrepancy in reports
